

# TRUE MYTH

## 2017 OBISPAN

69% CABERNET SAUVIGNON & 31% PETIT VERDOT  
SAN LUIS OBISPO COUNTY

The Obispan brings powerful Old World varieties grown in the warmer regions of San Luis Obispo County to life. While the hot days in areas of San Luis Obispo County including Paso Robles allow Cabernet Sauvignon and Petit Verdot to fully ripen, the Ocean influence and higher elevations of the hillsides bring cool nighttime temperatures that maintain high acidity in the grapes.

The Cabernet Sauvignon from Paso Robles in this blend comes from old vines, which impart bold, powerful and opulent notes of black cherry, cassis and pepper associated with high-quality Cabernet Sauvignon. The Petite Verdot bright a beautiful and rich color, tannins, structure, and floral aromas. In addition, the especially warm climate allows these grapes to develop intriguing fruit, herbal and floral notes. The oak aging adds rich spices.

The 2017 vintage in San Luis Obispo County was the first following years of drought. The winter rains nourished the soils allowing the vines to produce high-quality grapes despite a hot temperatures near Harvest.

After years resting in the bottle, this wine a journey that will be remembered!

### *Tasting Notes*

This wine full-bodied and powerful with dark black fruits, ripe red fruits, dried herbs and enticing spices. The well balanced acid structure and lends a brightness to the wine and the fine grained tannins provide a soft structure. This wine impresses with every sip.

### TRUE MYTH

Believing is the first step towards caterpillars becoming butterflies, grapes becoming wine and Myths becoming True. Like the butterflies who migrate through our land, True Myth embraces the power of transformation. We believe that opening a bottle of wine can be a transcendent experience. As we transform grapes grown in volcanic soil near the ocean in California's diverse Central Coast to richly expressive wines, we embrace the natural beauty of change and prove that balance is more than just a flavor descriptor.
